

NAB's petition 04-160 is unjust and must be rejected by the FCC. I was excited to hear that XM Instant Traffic & Weather was coming and feel they have every right to broadcast it as I do listen to it. It is not proper for the FCC or anyone to limit what I listen to on XM radio. It is my right to tune in and listen to whatever I chose. In fact I go as far as PAYING for the unregulated content on XM radio.
